TACEDGE

PILOT PROPOSAL

[Pilot name]

A narrow, jointly defined validation. Not a broad rollout.

[Customer] · [Project] · [Date] · Version [1.0]

Customer	[Customer name]
Project	[Project name]
Work type	[e.g. Anchoring / Drilling]
Location	[Site / region]
Start date	[Date]
Review date	[Date]
Operator group	[Crew / team]
Project manager	[Name]
Engineer	[Name, organisation]
TACEDGE lead	[Name]
Pilot support	[Name]

Opportunity

[Two or three sentences: the workflow pain this pilot addresses and why now.]

Current workflow

[How the work is captured and reported today. Name the systems, forms and hand-offs.]

Pilot objective

[One sentence. What will be true at the review date if the pilot succeeds.]

Scope

In scope

- [One work type, one crew, one project]
- [The specific records and evidence captured]

Out of scope

- [Everything else, named explicitly]

Users and roles

Role	Who	What they do in the pilot
Operator	[Names]	Capture work at the workface

Role	Who	What they do in the pilot
Project manager	[Name]	Configure, review and confirm records
Engineer	[Name]	Receive the released report

Project configuration

[What TACEDGE will configure before work starts: layout, sequence, testing rules, evidence requirements.]

Pilot workflow

Configure. Capture. Confirm. [Describe the specific flow for this pilot in those three movements.]

Success measures

Measure	Baseline today	Target at review
[e.g. time from capture to PM visibility]	[Current]	[Target]
[e.g. records confirmed without chasing]	[Current]	[Target]

Support approach

[Who supports the crew, how, and response expectations during the pilot.]

Data and confidentiality

[Where pilot data lives, who can see it, what happens to it after the pilot.]

Fallback process

[If TACEDGE is unavailable, the crew reverts to the current method. Describe the fallback and how records reconcile.]

Timeline

Stage	When	Output
Configure	[Week 0]	Project configured, crew briefed

Stage	When	Output
Capture	[Weeks 1–4]	Live work captured
Review	[Week 5]	Evidence reviewed against success measures
Decision	[Week 6]	Continue, adjust or stop

Responsibilities

Party	Responsibility
[Customer]	[Access, crew time, review participation]
TACEDGE	[Configuration, support, reporting]

Commercial terms

[Pilot pricing, what it includes, and what happens commercially at the decision point.]

Review and decision point

[The review meeting: who attends, what evidence is on the table, and the decision to be made.]

Approval / acceptance

	Name	Role	Signature	Date
[Customer]	[Name]	[Role]		
TACEDGE	[Name]	[Role]
