Executive summary

[Five sentences at most: what was tested, what the evidence showed, what TACEDGE recommends. Write this last.]

Purpose

[Why this report exists and who it is for.]

Project context

[The project, site, work type and period covered.]

Scope

[What this report covers and, explicitly, what it does not.]

Method

[How the work was configured, captured and confirmed. Name the record types.]

Workflow tested

[The specific Configure–Capture–Confirm flow under test.]

Evidence

[The records behind this report: counts, types, period. Reference appendices for detail.]

Label every statement in the findings by kind: Observed fact · User feedback · TACEDGE inference · Recommendation.

Findings

#	Finding	Kind	Evidence
F1	[What the data showed]	Observed fact	[Records, dates]
F2	[What users said]	User feedback	[Who, when]
F3	[What TACEDGE concludes]	TACEDGE inference	[From F1, F2]

Success measures

Measure	Baseline	Target	Result
[Measure]	[Baseline]	[Target]	[Result]

User feedback

> "[Representative quote, attributed to a role.]"

Issues and exceptions

#	Issue	Impact	Resolution
I1	[Issue]	[Impact]	[Resolution or open]

Lessons learned

- [What TACEDGE or the customer would do differently]

Recommendations

- [Recommendation, each traceable to a finding]
